GOVERNMENT EMPLOYMENT

County Government Employment in 1985

U.S. Department of Commerce
BUREAU OF THE CENSUS

ACKNOWLEDGMENTS

This report was prepared in the Governments Division by the Employment Branch, headed by **Alan V. Stevens**, under the general direction of **Vance Kane**, Assistant Division Chief for Programs. **Meredith L. DeHart**, **Betty P. Stark** and **Eddie H. Willner** of the Employment Branch were responsible for the assembly, review and analysis of major data components. **Sandra Reading** and **Nancy Proctor** assisted in the preparation and review of statistical tables. Data for major county governments were reviewed and assembled in the Employment Branch. Data Preparation Division, **Joseph S. Harris**, Chief, was responsible for the review and assembly of all other county government data.

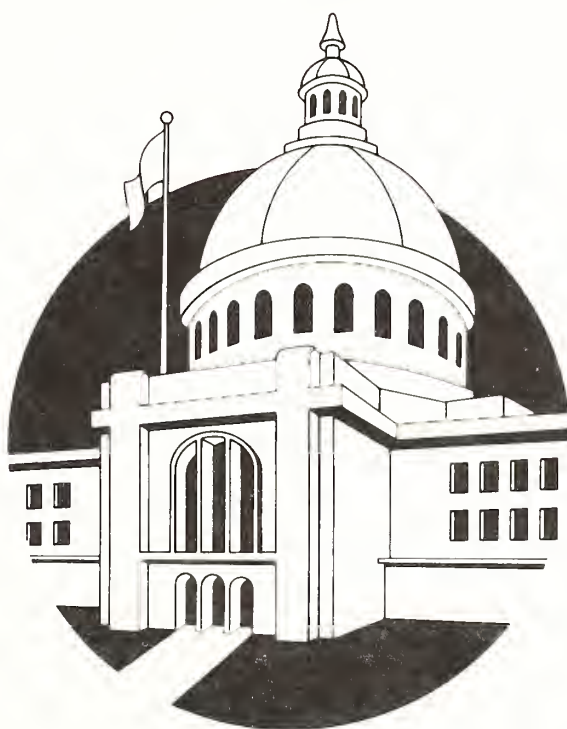

Data processing operations were directed by **John Burroughs**, under the supervision of **Judith Jennings**, Chief of the Governments Division's Computer Utilization Branch.

Publication copy was prepared in the Governments Division under the supervision of **Corrine W. Davis**. Advice and service in the preparation of copy for publication were provided by Publications Services Division.

The cooperation and assistance of the many county government officials who provided information for this report are gratefully acknowledged.

For further information regarding data contained in this report, contact **Alan V. Stevens**, Governments Division, Bureau of the Census, Washington, D.C. 20233 (area code 301/763-5086).

INTRODUCTION

Special Note

This report excludes statistics on full-time equivalent employment as shown in previous years' issues. The Census Bureau is converting the derivation of these statistics from a payroll-based formula to a formula using hours worked by part-time employees. Publication of full-time equivalent employment statistics will resume with the published results of the survey of government employment for October 1986.

The U.S. Census Bureau conducts an annual survey of government employment as authorized by Title 13, United States Code, Section 182. These surveys measure the number of government civilian employees and their gross pay for the month of October by type of government and by governmental function.

The 1985 Government Employment Series (Series GE85) contains four reports: No. 1, *Public Employment in 1985*; No. 2, *City Employment in 1985*; No. 3, *Local Government Employment in Major County Areas: 1985*; and No. 4, *County Government Employment in 1985*.

This report provides national statistics on county government employment and payrolls for the month of October 1985. Statistics presented in this report are based on a mail canvass survey that includes a sample of approximately 2,100 county governments.

ORGANIZATION OF THIS REPORT

This introductory text describes the scope and major findings of the county government portion of the 1985 survey of government employment, as well as the sources and limitations of data. Definitions of terms used in this report are presented in a section at the end of the report.

Tables 1 and 2 present national level aggregates of county government employment and payrolls for 1985 and recent years. Tables 3 through 6 present current year national statistics by population-size group of county governments. Data on employment, payrolls, and average October earnings for full-time employees in individual county governments having 100,000 or more population in 1982 are shown in tables 7 and 8.

SCOPE

The county government findings presented in this report are based mainly on information reported by county government officials on Census Bureau questionnaires. Each county or agency surveyed was asked to report the number of paid full-time employees, number of paid part-time employees, gross pay for full-time employees, and gross pay for part-time employees for the payroll interval(s) that included the date of October 12, 1985. The length of the payroll intervals was also requested so that the Census Bureau could convert nonmonthly payroll amounts to a standardized monthly equivalent during electronic processing of data.

FINDINGS

Employment by county governments is estimated to be 1,891,285 in October 1985 and county government payrolls for that month are estimated to be \$2.8 billion.

From October 1984 to October 1985, the estimated number of county government workers increased by 20,000 or 1 percent, and gross October payrolls grew \$224 million, or 8.6 percent. County governments accounted for 19.5 percent of all local government employment and 18.7 percent of all local government payrolls in October 1985. Approximately 16.8 percent of all county employees in October were employed on a part-time basis.

The average earnings of full-time county employees was \$1,687 for the month of October 1985, an increase of 6.4 percent from the October 1984 average.

TRENDS IN COUNTY EMPLOYMENT AND PAYROLLS

Since the end of World War II, local governments including county governments have shown a steady rise in the number of employees. During the past decade the increase in local government employment was in large part due to continued increases among county governments as other types of local governments exhibited stagnation or decline in their employment levels. County governments did reduce their employment levels by more than 2 percent between 1980 and 1983, however. Table A provides a summary of county government employment and payrolls since 1957.

Since 1980 employment in county governments has increased at an average annual rate of .4 percent as compared to in-

creasing at an average annual rate of 3.5 percent for the 1975 to 1980 period. Increases in October payrolls during the recent 5-year period averaged 7.8 percent as compared to an average annual rate of 10.3 percent in the 1975-1980 period.

There are many factors which influence county government employment levels. Responsibility for the operation of certain services may shift between governments and between private operators and governments. These shifts may involve the transfer of operating authority from one local government to another; from local governments to State governments, or vice versa; and between State or local governments and private sector operators. The Bureau of the Census makes every reasonable effort to reclassify these operations when transfers occur. The availability of funding from other levels of government also affects county government employment levels.

Further detail on employment and payroll data for county governments in 1985 and prior years can be found in tables 1 and 2.

Table A. County Employment and Payroll:
1957 to 1985

Year (for October except as noted)	All employees (full-time and part-time) (thousands)	Monthly payroll (millions of dollars)

FUNCTIONS OF COUNTY GOVERNMENTS

Individual county governments differ widely in the range of their responsibilities and services. One factor in this diversity is that counties were established to provide general local government to specific geographic areas that vary in their population concentrations. In addition, State law or local options establish widely differing functional responsibilities for county governments.

The governmental functions most commonly conducted by counties are highways, public welfare, health, police protection, correction, financial administration, and general control. However, other services provided by comparatively few counties, such as schools or hospitals, comprise a considerable portion of all county employment and payrolls.

In most of the United States, public schools are provided by school districts which operate as independent local governments. However, there are five States where public schools for elementary and secondary education are provided primarily by county governments (Alaska, Maryland, North Carolina, Tennessee, and Virginia), and in these States the education function represents about three-fifths to four-fifths of total county employment and payrolls.

In October 1985 the education and hospital functions accounted for more than one-third of all employment and payrolls of county governments. Following in table C are percentage distributions of county government employment and payrolls, by

function, based on the data shown in tables 1 and 2 for all counties.

DATA FOR MAJOR COUNTIES

Tables 1 and 2 provide comparisons of data for county governments having 100,000 or more population with the totals for all counties. Although these large counties account for only 13 percent of all counties, they employ 62 percent of all county government workers and account for 70 percent of total October 1985 county government payrolls. Table D provides a distribution of employment and payrolls, by function, for all counties with a population of 100,000 or more based on data shown in tables 1 and 2.

Tables 3 and 4 present distributions of county employment and payrolls by population-size groups; table 5 shows the ratios of full-time employment per 10,000 population; and table 6 presents average earnings of full-time employees by population-size groups.

In tables 7 and 8 of this report, employment and payroll data are shown individually for each of the 390 counties which had 100,000 population or more in 1982. Intercounty comparisons based on these figures should take account of the presence or absence of other underlying local governments and the varying allocation of governmental responsibilities between the State and various types of local government.

Table C. Functional Distribution of County Employment and Payrolls: October 1985

Function	Percent of total employment	Percent of October payroll
Total.....	100.0	100.0
Education.....	23.9	23.2

Fire protection.....	1.8	2.5
Libraries.....	1.8	1.1
Local utilities.....	1.1	1.3
All other functions.....	8.6	8.6

Excluded from tables 7 and 8 and the rest of this report are a number of consolidated city-county governments that are classified for Census Bureau purposes as municipalities. Data for certain of these governments, comparable to the statistics in this report, can be found in *City Employment in 1985*.¹

STATEMENT OF PROCEDURE

Data presented in this report are based on information solicited by mail questionnaire from a State-by-State sample of county governments. The survey panel includes with certainty all county governments having 50,000 or more population in 1980, all county governments which operate school systems (elementary, secondary, or higher education institutions), and other county governments whose expenditures or level of indebtedness exceeded a specified ratio in each State. The survey panel also includes a random selection of the remaining county governments within each State, further grouped by population size. The probability of selection for each noncertainty county government was based on the ratio of that county's expenditures or indebtedness to the total expenditures or indebtedness of all noncertainty county governments within each State.

Usable replies were received from 81 percent of the counties canvassed for the October 1985 survey. Prior year data were utilized for nonrespondent counties.

Data in tables 1 through 6 for all counties of 100,000 or more population were directly summed. Figures reported by the smaller counties in the sample were expanded in accordance with their probability of sample selection. Data presented for counties of 100,000 population or more can thus be taken as results of complete coverage enumeration, and as being subject only to some possible undetected errors in the completeness or proper classification of data for individual county governments. However, because a sample has been taken to represent counties of less than 50,000 population, the all-county aggregates in tables 1 through 6 are subject to sampling variation that may cause them to differ somewhat from the result of complete coverage enumeration. Calculations of the standard error of the October 1985 estimates were not completed at the time this report was prepared. The relative standard errors are expected, however, to be generally less than 2 percent (at the two-thirds confidence level) of the estimated figures for county government totals of all employees, full-time employees, total payrolls, and full-time payrolls. Estimates for components that make up a relatively minor part of the totals may be subject to particularly large variability and should be interpreted with special caution. The results of the computation of standard errors for the October 1985 survey will be made available upon request.

As calculated for this report, the standard error also partially measures the effect of certain nonsampling errors but does not measure any possible systematic biases in the data. Employee and payroll figures reported by county government officials are generally accepted as being substantially correct. In some cases, varying interpretations of the instructions or deficiencies in county employment and payroll records may make it difficult for

¹Baton Rouge (East Baton Rouge); Boston (Suffolk); Columbus (Muscogee), GA; Denver; Honolulu; Indianapolis (Marion); Jacksonville (Duval); Lexington-Fayette, KY; Nashville-Davidson; New Orleans (Orleans); New York City; Philadelphia; and San Francisco.

officials to provide complete and accurate reports for their governments. These difficulties are dealt with by (1) careful definition of terms and detailed instructions in difficult cases, (2) supplementary correspondence and telephone followup to officials, and (3) intensive examination of data collected—i.e., verification of internal consistency and comparison with previous reports and other sources of data. Errors that may be introduced during processing (input preparation, etc.) are minimized through the use of intensive computer editing of the data at various stages of the processing system.

This report is one of several recurrent annual publications based on a survey of government employment in October. One companion report, *Public Employment in 1985*, presents State-by-State data for all types of local governments, as well as for State governments and the Federal Government. A second report, *City Employment in 1985*, provides data for each of the 438 cities and 27 major urban townships having a population of 50,000 or more in 1982, plus national and size group totals for all city governments. *Local Government Employment in Major County Areas: 1985* is also published in this series to provide estimates of all local government employment and payrolls in each county area having 100,000 or more population in 1980.

Additional detail on county government employment and payrolls for the month of October 1982 appears in final reports of the 1982 Census of Governments—particularly in

Compendium of Public Employment (Vol. 3, NO. 2) and *Employment of Major Local Governments* (Vol. 3, No. 1).

Additional information and detail for the basic data set from the annual surveys of government employment and the census of governments' employment survey are available on magnetic tape. Information concerning the purchase of these magnetic tapes is available from the Bureau of the Census, Data User Services Division, Washington, DC, 20233 (telephone area code 301, 763-4100).

ACKNOWLEDGMENT

Grateful acknowledgment is made of the assistance of the numerous county officials throughout the Nation who helpfully supplied information regarding employment and payrolls of their jurisdictions.

MEANING OF SYMBOLS

The symbols in the tables have the following meanings:

- Represents zero or rounds to zero.
- (NA) Not available.
- (X) Not applicable.
- (Z) Less than one-half the unit of measurement shown.

DEFINITIONS OF SELECTED TERMS

A discussion of the terms and classifications used in this report is presented below. These terms are grouped in the categories of Subject Matter Concepts and Governmental Functions.

SUBJECT MATTER CONCEPTS

County. Organized county governments are found throughout the Nation except in Connecticut, the District of Columbia, Rhode Island, and limited portions of a few other States. These governments are legally designated as “boroughs” in Alaska and “parishes” in Louisiana. Excluded from this category are consolidated city-county governments, cities which operate outside the geographic limits of any county, or cities which have no organized county government operations within their boundaries. Comprising this group are the following: Anaconda, Anchorage, Baltimore, Baton Rouge, Boston, Butte, Carson City, Columbus (GA), Denver, Honolulu, Indianapolis, Jacksonville, Juneau, Lexington (KY), Nashville, New Orleans, New York, Philadelphia, St. Louis, Sitka, San Francisco, and Washington, DC, as well as the “independent cities” in Virginia. Nantucket, MA, is classified with townships.

Employment and employees. Employment, as used in this report, refers to all persons gainfully employed by and performing services for a government. Employees include all persons paid for personal services performed, including persons paid from federally funded programs, paid elected officials, persons in a paid leave status, and persons paid on a per meeting, annual, semiannual, or quarterly basis. Unpaid officials, pensioners, persons whose work is performed on a fee basis, and contractors and their employees are excluded from the count of employees. *Full-time employees* are defined to include those persons whose hours of work represent full-time employment in their employer government; *part-time employees* are those persons who work less than the standard number of hours for full-time work in their employer government.

October payroll. Payroll amounts shown in this report represent gross payrolls for the 1-month period of October 1985. The gross payroll includes all salaries, wages, fees, or commissions paid to employees during the pay period which included the date of October 12, 1985. Payroll amounts reported for a period other than one month were converted to represent an amount for the month of October.

Average October earnings. Average October earnings shown in this report are for full-time employees only and represent the

quotient of full-time employee payroll divided by the number of full-time employees.

GOVERNMENTAL FUNCTIONS

Employment and payrolls of county governments are classified according to the major function or activity of the agency, office, or other organizational entity in which the individual is employed. Following is a brief description of each functional category used in this report:

Air transportation. Operation and support of county operated airport facilities.

All other and unallocable. The use of this classification varies from table to table in this report; in each tabulation, however, this classification represents all activities not individually specified.

Correction. County activities pertaining to the confinement and correction of adults and minors accused or convicted of criminal offenses. Any pardon, probation, and parole activities are also included here.

Electric power. County government activities associated with the production or acquisition of electric power and distribution to individual consumers.

Financial administration. This function includes activities concerned with tax assessment and collection, custody and disbursement of funds, debt management, administration of trust funds, budgeting, and other governmentwide financial management activities.

Fire protection. This classification is applied to county government fire protection and prevention activities plus any ambulance, rescue, or other auxiliary services provided by the fire protection agency. Volunteer firefighters, if remunerated for their services on a “per fire” or some other basis, are included as part-time employees. The subcategory of *firefighters* shown in this report includes personnel trained and/or engaged in fire suppression and prevention.

Gas supply. County government activities associated with the acquisition of natural or propane gas supplies and distribution to individual consumers.

General control. This category relates to the judicial, legislative, and governmentwide administrative agencies of county governments. Included here are overall planning and zoning activities, central personnel and administrative services, the office of chief executive, legislative activities, and court and court-related activities.

Health. Administration of public health programs, community and visiting nurse services, immunization programs, drug abuse rehabilitation programs, health and food inspection activities, operation of out-patient clinics, and environmental pollution control activities are included in this classification.

Higher education. County government, degree granting institutions which provide academic training above grade 12 are included here. *Instructional employees* includes persons engaged in teaching and related academic research.

Highways. Activities associated with the maintenance and operation of streets, roads, sidewalks, bridges, tunnels, toll roads, and ferries are included at this function. Snow and ice removal, street lighting, and highway and traffic engineering activities are also included here.

Hospitals. This category includes only county government operated medical care facilities which provide in-patient care. Employees and payrolls of private corporations which lease and operate county owned hospital facilities are excluded.

Housing and community development. The operation of housing and redevelopment projects and other activities to promote or aid housing and community development are included in this category.

Libraries. This classification applies only to libraries operated by county governments for use by the general public. School and law libraries are included in the "Local schools" or "Higher education" and "General control" categories, respectively.

Local schools. All activities associated with county government operated elementary, secondary, and vocational-technical schools, including special education programs and ancillary services associated with the operation of schools (e.g., pupil transportation and food service). *Instructional employees* includes not only classroom teachers, but also principals, supervisors of instruction, librarians, teacher aides, library aides, and guidance and psychological personnel. *County dependent school systems* are administrative agencies of the county government and are not counted as separate governmental entities by the

Bureau of the Census. Excluded from this report are statistics on the operation of independent school districts and dependent school systems operated by State, city, or township governments.

Natural resources. This function includes activities primarily concerned with the conservation and development of natural resources—forest fire prevention and control, flood control, irrigation, drainage, land and forest reclamation, fish and game preservation and control, soil conservation, forestry, agricultural aids and research, agricultural development and inspection, and mineral resources activities.

Parks and recreation. County government activities which include the operation and maintenance of parks, playgrounds, swimming pools, public beaches, auditoriums, public golf courses, museums, marinas, botanical gardens, and zoological parks.

Police protection. All county government activities concerned with the enforcement of law and order, including coroner's offices, police training academies, investigation bureaus, and local jails, "lockups," or other detention facilities not intended to serve as correctional facilities. The subcategory of *police officers* includes only persons with the power of arrest.

Public welfare. Included in this category are such activities as the administration of various public assistance programs for the needy, operation of homes for the elderly, indigent care institutions, and programs which provide payments for medical care and other services for the needy. Health care and hospital services provided directly by a county government, however, are included in the "Health" and "Hospital" functions rather than here.

Sanitation other than sewerage. Refuse collection and disposal, operation of sanitary landfills, and street cleaning activities.

Sewerage. This function includes the provision, maintenance, and operation of sanitary and storm sewer systems and sewage disposal and treatment facilities.

Transit. Included at this category are activities relating to county government operation and maintenance of public mass transit systems (e.g., bus, subway, surface rail, and street railroad systems). Elementary and secondary school transportation systems are included in the "Local schools" function.

Water supply. County government activities associated with the production or acquisition of water supplies and distribution to the public.
